

Safety Policy

The management team of Abercorn Construction & Maintenance Ltd gives the highest priority to ensuring that our own employees, and all other employees working on sites managed by the Company, can work safely and healthily and remain free from injury and also to protect those who may be affected by our activities from harm.

Abercorn Construction & Maintenance's Safety Management System outlines safe systems of work and identifies workplace/site hazards for all employees. Through our Safety Management System all Management and Staff are made aware of any duties/procedures to be followed so as to comply with any relevant legislation, in particular the 2005 Act, and the Safety, Health and Welfare at Work (Construction & Maintenance) Regulations 2013.

All employees are expected to comply with policies and procedures as described in relevant sections of the Safety Management System.

The objectives of our safety policy are:

- The prevention of personal injury
- The prevention of property and environmental damage
- That safety systems are monitored/updated on a regular basis

We work actively with external certification bodies, Construction & Maintenance industry safety groups and safety experts to ensure that – Abercorn Construction & Maintenance Ltd safety policies and management are informed by best-practices.

Our Safety Management System (SMS) sets out the structures, procedures and processes for the effective implementation of this policy. The Safety Management System will be amended as work procedures necessitate and as experience is gained.
